

Functions

What's the chat reply function?

Evaer Skype video recorder has a chat reply function, how to use it?

Normally, we use this function when we are not available to pick up the calls. But you can also use it if you don't wanna pick up the calls via stick the checkbox of "**Reply chat at online status**".

You can choose reply chat msg at the status you would like, such as away, NA or DND, even you can enable it when you are online.

And in the chat reply msg content, you can customize the information or use the system default one.
